## Job Description

SriLankan Airlines Ltd, the National Carrier of Sri Lanka operates with a network of destinations throughout Asia, the Middle East, Europe, and Australia. The Airline has a strong presence in the Maldives and Southern India. SriLankan is a member of the 'oneworld' alliance.

SriLankan IT Systems drives the airline's IT strategy through digital transformation, technology adoption, data modeling, business intelligence, and business continuity. The focus is on transforming business and operational processes, expanding digital passenger reach, and improving customer experience through solutions design, development, and integrations while enhancing airline IT domain knowledge. Award-winning SriLankan IT team is seeking a dynamic individual to join as a Software Quality Assurance Engineer.

The individual is responsible for Ensure to drive the delivery of high-quality, secure, and reliable software that supports critical airline operations and business objectives. Focuses on implementing structured testing strategies, identifying and resolving defects early, and improving overall system performance and usability. Promotes adherence to industry standards, regulatory requirements, and internal quality frameworks while collaborating with development, IT Security, and Quality teams.

### Key responsibilities will include:

- Develop and update test plans, test cases, and test scripts based on requirements and specifications for upcoming releases.
- Review and maintain testing documentation, including test cases, test scripts, and quality metrics, to ensure accuracy and completeness.
- Identify, document, and prioritize defects or issues in the software, using bug tracking tools to report findings to the development team.
- Participate in daily stand-ups, sprint planning, and retrospective meetings to discuss progress, challenges, and feedback with the team. Document the specifications and design for code development and testing with the Business Analyst (BA) and Quality Assurance (QA) support.
- Perform regression testing to verify that recent code changes have not adversely affected existing functionality.. Analyze testing results, compile quality reports, and present findings to stakeholders to provide insights into the software's quality and readiness for release.
- Identify opportunities for process improvements in testing methodologies and practices, promoting a culture of continuous quality enhancement. Provide training and support to team members on quality assurance practices, tools, and methodologies to build a stronger quality-focused team.
- Facilitate and support user acceptance testing by coordinating with end-users to validate the software meets business requirements before deployment. Ensure that testing practices align with industry standards and regulatory requirements, maintaining compliance throughout the software development process.
