

RADIOLOGIC TECHNOLOGIST (MH)

Open to Internal and External Candidates

Organizational Unit	: MIGRATION HEALTH
IOM Classification	: RADIOLOGIC TECHNOLOGIST (MH)
Duty Station	: COLOMBO
Salary Per Month	: LKR 164,356.00 (G5)
Type of Appointment	: ONE YEAR FIXED TERM
Estimated Start Date	: AS SOON AS POSSIBLE
Closing Date	: MAY 31, 2023

Established in 1951, IOM is a Related Organization of the United Nations, and as the leading UN agency in the field of migration, works closely with governmental, intergovernmental and non-governmental partners. IOM is dedicated to promoting humane and orderly migration for the benefit of all. It does so by providing services and advice to government and migrants.

IOM is committed to a diverse and inclusive environment. Internal and external candidates are eligible to apply to this vacancy. For the purpose of the vacancy, internal candidates are considered as first-tier candidates.

Context:

Under the overall supervision of the Chief Migration Health Officer and the direct supervision of the Senior Radiologic Technologist, the successful candidate will be responsible for the following duties and responsibilities in relation to the Migration Health Assessment Programme in Colombo, Sri Lanka

Core Functions / Responsibilities:

1. Take good quality chest X-ray images of migrants as requested by Physicians and/or Radiologist in accordance with IOM and international radiographic standards and resettlement countries technical instructions. Take the appropriate additional chest X-ray views using the standard procedures, when requested.
2. Explain the X-ray examination procedures to applicants and answer questions. Prepare equipment's and examination rooms for use, perform proper ID checking, correct biodata entry to CR/DR machines and standard labelling of the radiographic images avoiding substitutions.
3. Apply proper radiographic techniques and radiation protection procedures during X-ray taking, including providing pelvic lead shielding for all, double wrap-around lead shielding for pregnant woman, positioning of applicants, collimation of X-ray beam, and use of proper X-ray exposure factors, and monitoring of applicants during the examinations.
4. Perform proper processing of digital images on CR/DR machine, review the image quality and repeat when the image quality is not acceptable. Report important/urgent information to Radiologists and/or Physician.
5. Contribute to maintaining consistently high-quality chest X-rays in the Radiology Unit through proper utilization of radiographic techniques, checking and correcting technical quality of the images, adherence to technical requirements of resettlement countries and training of staff involved in chest X-ray taking. Take the role of quality assurance focal person for the X-ray Unit, as needed.
6. Participate in ensuring the overall radiation safety of the applicants, staff and the public by applying the standard radiation protection rules and regulations, regularly wearing personal radiation measurement badges, assisting the reading of the personal radiation monitoring badge, performing the duties of radiation protection focal person and communicating with the respective authorities, as needed.
7. Take part in the regular and timely quality assurance of the CR/DR X-ray machines through proper handling of machines and regular checking of equipment performance and reporting of issues immediately. Contact external and internal technical service providers regarding maintenance service and repair of the X-ray equipment as needed.
8. Contribute in optimizing the workflow in the Radiology Unit through applying regular quality control and improvement of the standard operating procedures including identification procedures and correctness of data entry to ensure quick, correct, and smooth X-ray processing and timely delivery of chest X-ray images and reports.
9. Prepare daily worklists, barcodes, check the identity of applicants, radiographic counselling, uploading digital Chest X-rays images to e-Medical website, and/or burning images on CDs.

10. Prepare statistical summary reports on operational activities of the Radiology Unit, document any other information and properly keep records as needed.
11. Communicate with the Radiologist and/or Teleradiology Centers for the reading of the chest X-rays, take the role of the Country Office's focal person for coordinating the radiology chest X-ray reading workflow and provide the chest X-ray reports to the panel physicians as needed.
12. Contribute in implementing infection control measures and maintaining a tidy and neat work environment in the Radiology Unit.
13. Suggest additional measures to improve the quality, speed or safety of the radiological procedures as needed.

Required Qualifications and Experience

Education

- University Degree in Radiography, Radiologic Technology or similar level qualifications in radiography from an accredited academic institution with three (3) years of professional experience in the related field; or
- Five (5) years of related work experience with a Diploma in Radiography;
- Valid license (SLMC Reg.) to practice as a Radiographer in Sri Lanka is mandatory.

Experience

- Experience in radiography especially in CXR, DR/CR machine, radiology information systems;
- Knowledge and Experience in Picture archiving and communication systems;
- Previous experience in screening chest X-ray and health assessment programs.

Skills

- Good computer skill, especially in Microsoft Excel is essential.

Languages
